

Healthcare Support Occupations (31-0000)

EEO Tabulation 2006-2010 Wages by Occupations (5 year ACS data)

The EEO Tabulation is sponsored by four Federal agencies consisting of the Equal Employment Opportunity Commission (EEOC), the Employment Litigation Section of the Civil Rights Division at the Department of Justice (DOJ), the Office of Federal Contract Compliance Programs (OFCCP) at the Department of Labor, and the Office of Personnel Management (OPM).

Healthcare Support Occupations (31-0000)

SOC	Occupation Gender	No earnings	\$1 to \$14,999 or less	\$15,000 to \$24,999	\$25,000 to \$34,999	\$35,000 to \$49,999	\$50,000 to \$74,999	\$75,000 to \$99,999	\$100,000 to \$124,999	\$125,000 or more
31-1010	Nursing, psychiatric, and home health aides 3600									
	Total, both sexes	0	1,920	2,460	2,930	1,145	425	30	4	40
	Male	0	160	90	370	185	160	10	4	0
	Female	0	1,760	2,370	2,560	960	265	25	0	40
31-2010	Occupational therapy assistants and aides 3610									
	Total, both sexes	0	15	0	65	25	25	0	0	0
	Male	0	0	0	10	0	0	0	0	0
	Female	0	15	0	55	25	25	0	0	0
31-2020	Physical therapist assistants and aides 3620									
	Total, both sexes	0	30	50	55	95	30	0	0	0

	Male	0	120	30	30	40	4	0	0	0
	Female	0	290	205	145	130	20	0	0	0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Earnings are defined as the sum of wage or salary income and net income from self-employment. An individual with earnings is one who has either wage/salary income or self-employment income, or both. Respondents who "break even" in self-employment income and therefore have zero self-employment earnings also are considered "individuals with earnings." Respondents with a net loss are also considered "individuals with earnings." For more information, see the Subject Definitions at http://www.census.gov/acs/www/data_documentation/documentation_main/.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.
