New Hampshire’s Workforce Connect is now here!

NH Job Seekers and Claimants will no longer need multiple User IDs and Passwords.

As of January 28, 2020, anyone who accesses the NH Job Match System or the Unemployment Insurance System will need to do a one-time Single Sign On (SSO) Registration and a one-time Integrated Registration.

The New Hampshire’s Workforce Connect is a three-module software suite:

- **Single Sign On (SSO)** that eliminates the need for the user to have multiple user IDs and passwords, streamlining the login process,

- **Integrated Registration** that means the job seeker does not need to enter their personal information multiple times for different services and eliminates redundant activity and means real time data transfers between systems.

- **Dashboard** that will allow the users to see multiple widgets with Job Search and services related to their JMS registration, UI information specific to their claim, ELMI information relative to their location and much more.
