- Ambulatory Health Care Services

Education and Training

Nursing assistants must complete a state-approved education program in which they learn the basic principles of nursing and complete supervised clinical work. These programs are found in high schools, community colleges, vocational and technical schools, hospitals, and nursing homes. In addition, nursing assistants typically complete a brief period of on-the-job training to learn about their specific employer's policies and procedures.

* Wage estimates based on surveys conducted from November 2013 to May 2016, aged to June 2017.

After completing a state-approved education program, nursing assistants take a competency exam. Passing this exam allows them to use state-specific titles. Nursing assistants who have passed the exam are placed on a state registry. Nursing assistants must be on the state registry to work in a nursing home.

Some states have other requirements, as well, such as continuing education and a criminal background check. Check with state boards of nursing or health for more information.

In some states, nursing assistants can earn additional credentials, such as becoming a Certified Medication Assistant (CMA). As a CMA, they can give medications. Nursing assistants may also choose to become certified in a specialty area, such as geriatrics.

Interests (Holland Code): SCR

- Social — Social occupations frequently involve working with, communicating with, and teaching people. These occupations often involve helping or providing service to others.
- Conventional — Conventional occupations frequently involve following set procedures and routines. These occupations can include working with data and details more than with ideas. Usually there is a clear line of authority to follow.
- Realistic — Realistic occupations frequently involve work activities that include practical, hands-on problems and solutions. They often deal with plants, animals, and real-world materials like wood, tools, and machinery. Many of the occupations require working outside, and do not involve a lot of paperwork or working closely with others.

Career Cluster: Health Science

Work Environment

Nursing assistants and orderlies work in nursing and residential care facilities and in hospitals. They are frequently active and may need to help lift or move patients. They wear uniforms to protect their clothing and to promote cleanliness.
