Nativity of New Hampshire's Residents

Over 95 Percent of Granite Staters were Born Citizens of the United States

New Hampshire remains a state with an overwhelming share of native born citizens, although less than half of the population was born in the Granite State. The share of New Hampshire residents who were foreign born remains small, but this number grew faster than total population between Census years 1990 and 2000.

New Hampshire had 1,235,786 residents on April 1, 2000, up 11.4 percent from 1990. Over 95 percent of Granite Staters were born American citizens. The number of residents born in a different state grew at a faster rate, 11.9 percent, than those that were born in New Hampshire, 9.3 percent. The portion of residents that were born outside the United States remains relatively low, 0.9 percent.

Foreign born residents rose from 41,193 in 1990 to 54,154 in 2000, a growth of 31.5 percent. New Hampshire attracted about 2,000 new foreign born residents per year over the Census decade, compared to about 1,000 per year during the previous Census decade. In 2000, over 47 percent of New Hampshire's foreign

born residents were naturalized citizens. The number of residents who were not a citizen increased from 18,317 in 1990 to 28,393 in 2000, a growth of 55 percent.

Over 92 percent of New Hampshire's residents spoke English-only at home, ten percentage points higher than the nation. It may come as no surprise that in New Hampshire, French was the second most frequent language spoken at home, with a 3.1 percent share, while the nation's share was less than one percent. What may be surprising is these numbers are dropping, despite the fact that the state borders the French speaking Canadian Province of Quebec. New Hampshire experienced a decrease of nearly one-third, while the nation saw a dip of over one quarter from 1990 to 2000.

Spanish remains the state's third most frequent language spoken at home, with a 1.4 percent share, while the nation had a share of 10.5 percent, ranking it second in the nation. The Granite State experienced a 63.6 percent growth in the number of residents who speak Spanish at home while the nation gained 54.2 percent. Every state in New England saw increases ranging from 34 percent in Maine to 116 percent in Rhode Island. If Spanish continues to grow at the rate it has both in the state and the nation, New Hampshire businesses will need to consider the impact it will have on the future of their companies in production and marketing.

Gail Houston

Nativity of New Hampshire's residents

	1990	2000	% Change

New publications released

Job Notes 2002 available at <http://www.nhes.state.nh.us/elmi/nhcrn/jobnotes.htm>

Job Notes 2002 provides information to assist students in making more informed and better educated choices about their futures. The periodical is a career planning and development tool for the selection, planning, and building of a successful career. This edition provides career development information for the reader. Included are articles about stages of change, Web searching, career planning, learning styles, and transferable skills. Information about the jobs, how many workers in that occupation, and the projected demand for future employees, as well as wage information are also covered. Students, guidance counselors, parents, and individuals entering the job market or changing careers will find *Job Notes 2002* a useful tool.

Crime in New Hampshire – The latest STAT

Federal Bureau of Investigation's (FBI) Uniform Crime Reporting (UCR) program provides comparable crime statistics among the states from data supplied by law enforcement agencies. During 2000 New Hampshire had 30,068 serious crime offenses reported, the sixth lowest number in the nation. The Granite State continues to have the lowest crime index in New England 2,433.1 per 100,000 residents. New Hampshire's crime index dropped 33.3 percent since 1990. During this time the property crime index dropped 35.7 percent, while the violent crime index increased 33.4 percent.

Crimes involving the taking of property and money occur more often than ones where force or the threat of force is used. According to Morgan Quitno Press's *Most Dangerous/Safest State Award*, New Hampshire maintained its position of second safest state in the nation.

One Crime Offense Occurs Every 17.5 Minutes	One Property Crime Occurs Every 18.8 Minutes	One Violent Crime Occurs Every 4.0 Hours
One Burglary Occurs Every 1.8 Hours		One Larceny-Theft Occurs Every 25.3 Minutes
One Motor Vehicle Theft Occurs Every 4.1 Hours	One Murder Occurs Every 16.6 Days	One Forcible Rape Occurs Every 16.8 Hours
One Robbery Occurs Every 19.3 Hours		One Aggravated Assault Occurs Every 7.5 Hours

The data listed in the Crime Time section and in the individual boxes on this page should be viewed with care. This information is only to show the frequency of crime occurrences as a ratio of crime to fixed time intervals. This information should not be taken to imply a regularity of crime.

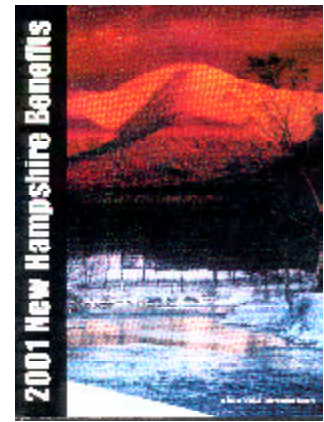

This brochure is packed with information on New Hampshire and its counties. What state did New Hampshire tie as the eighth fastest growing state in the nation? Where does the state rank nationally for per capita personal income? How much has average weekly wage gained since 1991? For the answers to these questions and more check out the brochure's 2001 Hot Points section.

What was the Granite State's population in 2001? What was each county's per capita personal income for 2000? What was the unemployment rate for 2001? How many people were employed in the Services and Manufacturing industries during 2001? Also included is civilian labor force data, covered employment data, and covered wage data. You will find all of this and more in the latest copy of *Snapshot*.

2001 New Hampshire Benefits, 49 pages, June 2002

This publication is a compilation of results from the 2001 New Hampshire Benefits survey that was done in late fall of 2001. Over 2,800 firms in the state participated in providing information about the variety of benefits they offer to their employees. A breakdown of the benefits by firm size groups, along with how many employees within each size group, is also provided.

Employers and employees can research what size firms offer the benefit type. How likely an employee would be to receive the benefit based on full-time or part-time work status is also included. The printed version is now available.

All publications are available by accessing our Web site at <www.nhes.state.nh.us/elmi>. For more information contact us at: (603) 228-4124, or at the bureau address listed on page 8.
