Electrician, High/Medium Voltage Trainee

High/Medium Voltage Electricians install, repair, alter and maintain electrical conductors, fittings, devices, fixtures and equipment, from the source of supply to the first disconnecting means of a building or structure, for over 600 volt power distribution systems including associated controls and metering. They must comply with the current edition of the National Electric Code. High/Medium Voltage Trainee electricians learn to perform above duties under supervision of a High/Medium Electrician, Master or Journeyman Electrician.
