

# Electrologist

Remove unwanted hair from patrons for cosmetic purposes by applying an electric current to the hair root. Prepare patron’s skin with antiseptic solution and insert sterile needles into hair follicle. Adjust equipment controls to regulate flow of electricity and then remove hair from follicle, using tweezers.

## Legislation

Statute: NH RSA 314  
Administrative Rules: Chapter He-P 1300

## Licensure Requirements

- Must be of good professional character
- High school graduate
- Training of at least 1,100 hours in a school of electrology obtained no less than ten months prior to graduation and approved by the New Hampshire Department of Health and Human Services

## Examination

The American Electrology Association written examination and the New Hampshire electrology practical examination are required, except for applicants licensed through reciprocity

## Continuing Education

Completion of ten hours of continuing education during the previous two-year period is required for renewal, of which five hours must be through live, didactic courses. Two of the hours must be in one of the following: Infection control, blood-borne diseases, universal precautions, HIV/AIDS, sanitation/sterilization, infectious skin diseases, or bacteriology.

## Reciprocity

Applicants who hold a license in another state may apply for licensure by reciprocity provided that state’s requirements are equivalent to or higher than New Hampshire’s requirements.
