

LEAD ABATEMENT CONTRACTOR

A Lead Abatement Contractor is a lead abatement contracting business entity. In order to engage in lead abatement activities licensed or certified professionals must be in the of a licensed lead abatement contractor. Lead abatement contractor licensure does not permit the licensee to actively engage in lead abatement activities. A licensed lead abatement contractor business entity's responsibilities include, assigning a certified lead abatement supervisor to a lead abatement project, employing only appropriately licensed and certified lead abatement professionals to conduct lead-based paint activities, and enduring that the business and its employees follow all applicable federal and state work practice standards for conducting lead-based paint activities.
