Identify pest problems in and about homes, hospitals, restaurants, lawns, golf courses, ornamental plantings, forestry plantings, agricultural crops, lakes, transmission and distribution lines, and other areas where pests are a problem. Select various pesticides and determine methods to control the pests by applying pesticides and assessing any hazards involved. Pesticide Applicators may work on a contract basis, on a farm raising agricultural commodities, on a golf course, for a school, for a governmental entity, or as part of their responsibilities as a landlord.

### Legislation
Statute: NH RSA 430:33
