LMI 101.1

Exploring and understanding
occupational wage
information

How much will this job pay?

The screenshot shows the O*Net website for the occupation of Respiratory Therapists (29-1126.00). The page includes sections for Relationships, Support, and Achievement. The 'Related Occupations' section lists several related jobs. The 'Wages & Employment Trends' section is highlighted with a green circle and contains the following data:

Metric	Value
Median wages (2014)	\$32.04 hourly, \$66,640 annual
State wages	[Button: Annual Salary Info]
Employment (2012)	2,712,000 employees
Projected growth (2012-2022)	Fastest than average (15% to 21%)
Projected job openings (2012-2022)	1,052,600
State trends	[Button: Employment Trends]
Top industries (2012)	Health Care and Social Assistance

A green callout box on the right side of the screenshot contains the text: "The option of selecting the state wages in O*Net".

Occupational Employment & Wages

New Hampshire Occupational Employment and Wages contains wage and employment estimates for roughly 600 occupations in New Hampshire. Data tables include job title, SOC (Standard Occupational Classification) code, estimated employment, entry level wage, mean (average) wage, median wage, and experienced wage. Our latest print publication contains data from May 2014 - aged to June 2015.

NSCITE

[▲ Back to Top](#)

For a more interactive way to access the data, use the following wage tables in HTML format. Compare pay rates across substate areas for each occupation.

June 2015 Occupational Wage Data ¹

Updating occupational wages gives our data users a better idea of current wage estimates. New Hampshire Employment Security used the Employment Cost Index (ECI) ² to update its May 2014 occupational wage data set (the latest available) to June 2015.

What do the wage levels represent?

New Hampshire Occupational Employment & Wages - 2015

The Entry, Mean (average), Median and Experienced Wage levels are explained in the Introduction section

How To Read the Tables

For each occupation in the tables of this publication, there is a corresponding SOC code and an estimate of employment within that occupation. The remaining data fields are Entry Level Wage, Mean (Average) Wage, Median Wage, and Experienced Wage.

- 1 SOC (Standard Occupational Classification) Code is a six-digit code designed to define occupations uniformly and to organize occupational data logically.
- 2 Estimated Employment is an approximation of the number of people employed in each area, occupational group, or specific occupation. Estimates for detailed occupations may not sum to the totals because the totals may include occupations not shown. Estimates do not include self-employed workers. If the estimated employment is not publishable, an NP will appear.
- 3 Entry Level Wage is the mean of the lower third of the population.
- 4 Mean (Average) Wage is the average hourly wage. If an hourly wage is not available (for occupations that typically have a nonstandard work week) the annual salary is displayed.
- 5 Median Wage is the 50th percentile of the distribution of wages. For each median wage, 50 percent of the workers in an occupation earn wages below, and 50 percent earn wages above median wage.
- 6 Experienced Wage is the mean of the upper two-thirds of the population.

Because of confidentiality or lack of data, not all occupations appear in all areas.

- Indicates a wage that is not publishable.

NP - Indicates an estimated employment that is not publishable.

NOTE: Wages aged to June 2015

Instructions from the Introduction

New Hampshire Occupational Employment & Wages - 2015

Data on Our Web Site

This publication can be accessed in its entirety or in sections from the New Hampshire Employment Security web site www.nhes.nh.gov/elmi/products/oes-prod.htm.

The files are in PDF format and can be viewed in Adobe Acrobat.

In addition to these PDF files, occupational tables are provided in HTML format. The same statewide and 16 substate areas from the print version are represented, as well as New Hampshire's 10 counties. (County information is not included in the print version.)

These easy-to-access HTML tables are interactive. Once the area and job title are found, simply click on the title to bring up an Area Profile for that job.

Area Profiles contain useful information such as:

- Job definitions (no need to consult a dictionary)
- Highest Employment and Best Pay for the top five areas in the state
- Colorful state maps with area breakdown, comparing the mean wage among areas
- Graphs that illustrate the spread of data around the median wage
- A summary of key employment and wage data for each occupation.

From Area Profiles, drop-down menus are available to locate a new occupation for that area, or a new area for the occupation.

The OES program has developed a brief, informative slideshow tutorial on our web site to enhance your use and understanding of the occupational and wage data presented. You may view this tutorial under the heading 'How to Use Wage Data' at www.nhes.nh.gov/elmi/products/oes-prod.htm.

Wages

Registered Nurses (29-1141)

Assess patient health problems and needs, develop and implement nursing care plans, and maintain medical records. Administer nursing care to ill, injured, convalescent, or disabled patients. May advise patients on health maintenance and disease prevention or provide case management. Licensing or registration required. Include advance practice nurses such as: nurse practitioners, clinical nurse specialists, certified nurse midwives, and certified registered nurse anesthetists. Advanced practice nursing is practiced by RNs who have specialized formal, post-basic education and who function in highly autonomous and specialized roles.
